

Don't Take a Vacation From Your Healthy Habits This Summer!

- 1.** Choose water workouts and make a splash as you get fit and strong.
- 2.** Add color, variety, and flavor to your meals with fruits and vegetables fresh from your local farmers market.
- 3.** Visit museums, the zoo, or an aquarium and walk for hours without realizing it.
- 4.** When the sidewalks sizzle, get moving indoors with a fun fitness video or DVD.
- 5.** Start a small garden in your yard or in a community patch to exercise, grow healthy food, and have fun with family and neighbors.
- 6.** Plan a weekend hike through a park, a family softball game, or an evening walk around your neighborhood.
- 7.** Fuel your summer with nutrient-rich foods like whole grains, fat-free or low-fat milk and cheese, seafood, lean meats, poultry, eggs, beans, nuts, and seeds.
- 8.** Drink plenty of water before, during, and after exercise, especially when the temperature soars.
- 9.** Strengthen your muscles at least twice a week with push-ups, pull-ups, or lifting weights.
- 10.** Beat the heat with an early morning activity. Go for a walk or bike ride while watching the sun come up.

The Water Cycle

Have you ever thought about the water you drink? How old is it? Have you used this water before? Well, you probably have. The Earth's water just keeps going round and round. We call this the water cycle. Today you could be drinking the same water as a dinosaur or a Roman soldier drank many, many years before.

We should all be grateful for the water cycle. Water is very precious. Without water there would be no life on Earth.

1) Name 6 different ways you use water:

The water cycle

1. Read.

When the wind moves, the clouds cool down and water vapour condensates.

This means water becomes liquid again.

Then, water vapour makes clouds in the sky.

After that, water precipitates from the clouds.

First, water evaporates from the oceans, rivers and lakes.

Water is everywhere! Water moves in a cycle.

2. Complete.

1. Water from the oceans, rivers and lakes turns into gas. This is called _____.
2. Gas forms into puffy clouds. This is called _____.
3. The wind blows. The clouds get heavy and cool. Water falls from the clouds. This is called _____.
4. Oceans, rivers and lakes collect the water. This is called _____.
